

I strongly oppose petitions RM-10805 thru 10811 as to their requests to either retain and, in some cases, bring back additional morse testing. I agree completely with the comments filed in opposition to each of these RMs by Leonard H. Anderson on 10/13/03.

Additionally, I ask the FCC to follow the suggested changes by No Code Int'l and the NCVEC organization as per RM-10786 and 10787 respectively.
